1- Proposal Abstract (maximum 200 word)

This project presents the design and implementation of a dynamic and interactive web-based system tailored to address [insert specific problem or domain, e.g., "smart irrigation management," "e-learning optimization," or "digital inventory tracking"]. By leveraging modern web technologies, the system ensures seamless data processing, responsive interfaces, and scalable backend services. The system has been developed following agile methodologies and incorporates both user-centric design and real-time analytics features.

This project presents the design and development of Forsa, a dynamic and interactive web-based job platform tailored to streamline job searching and recruitment processes. It is designed to support students, graduates, and professionals in finding suitable job opportunities efficiently. The system includes unique features such as built-in video interviews, real-time application tracking, and AI-powered job recommendations. Developed using modern web technologies and user-centric design principles, the platform enables employers to manage job postings, conduct interviews, and interact with candidates seamlessly. Forsa ensures a responsive interface, reliable performance, and intuitive navigation to deliver a smart and scalable employment .solution

2- Objectives

- Make it easy to find suitable jobs quickly
- Support students, graduates, and professionals
- Conduct interviews directly within the platform
- Display jobs in a clear and organized way
- Provide reviews to help users make better decisions

3- Requirements

:Website Structure and Technologies
Languages used: HTML, CSS, JavaScript, PHP
Database: MySQL
Development Tools: Visual Studio Code, XAMPP

:Main Pages & Functions
Home Page
Overview of the platform
Access to login/signup
Technology: HTML, CSS, JS
(Create Account (User / Company
Form to register as job seeker or company
Technology: HTML, CSS, PHP
Login Page
Secure login for users/companies
Technology: HTML, CSS, PHP
Profile Page
User profile with personal details, resume builder
Technology: HTML, CSS, PHP
Companies Page
List of registered companies with details
Technology: HTML, CSS, JS
Interview Page
Conduct or attend interviews via the platform
(Technology: HTML, CSS, JavaScript (possibly WebRTC or iframe integration
Notification Page
Smart notifications related to job matches or interview invitations
Technology: PHP, JavaScript
Job Board Page
Search and filter job listings
Save jobs for later
Technology: HTML, CSS, JS, PHP
Company Dashboard
Manage job postings, view applicants
Technology: HTML, CSS, PHP
Support Page
Contact form for help or inquiries
Technology: HTML, CSS, PHP
:Database Requirements
:Tables
(.users (user_id, name, email, password, resume, etc
(.companies (company_id, name, description, etc
(jobs (job_id, title, description, company_id, type, status
(applications (app_id, user_id, job_id, status
(interviews (interview_id, user_id, company_id, date_time, link
notifications (noti_id, user_id, message, seen_status(

Unique Features

Unique Features of Forsa Platform

1. Built-in interview system – Attend job interviews directly through the platform without third-party apps.
2. Smart and categorized notifications – Receive personalized alerts based on your preferences and activity.
3. Advanced and customized job filtering – Easily find the exact jobs you're looking for using smart filters.
4. Simple and user-friendly interface – The platform is easy to navigate, even for beginners.
5. Supports all job types – Whether you're looking for full-time, part-time, freelance, or remote work, it's all available.
6. Verified job listings – Job posts are reviewed to protect users from scams or fake offers.
7. Real-time application tracking – Instantly check the status of your job applications.
8. Built-in resume builder – Create or update your CV easily using built-in templates.
9. AI-powered job suggestions – Get job recommendations that match your skills and interests.
10. Company reviews and ratings – Read honest feedback from other applicants about employers.
11. Save jobs for later – Bookmark interesting jobs and apply when you're ready.
12. Profile strength indicator – See tips to complete your profile and make it more attractive to employers.
13. Multilingual support – The platform is accessible in different languages for wider reach.

AI tool

In the Forsa platform, several AI tools have been integrated to enhance user experience and improve the job-matching process:

- **AI-Powered Job Recommendation System**
- **Usage:** Analyzes users' profiles, resumes, and browsing behavior to suggest jobs that closely match their skills and interests.
- **Benefits:** Saves time for users and increases the chances of finding suitable opportunities.
- **Profile Strength Analyzer**
- **Usage:** Evaluates user profiles based on completeness, uploaded resume, listed skills, and activity. Provides suggestions to improve the profile.
- **Benefits:** Helps users build strong and attractive profiles for employers.
- **AI Resume Builder**
- **Usage:** Uses AI templates and suggestions to help users quickly generate or improve their resumes.
- **Benefits:** Ensures that users present themselves professionally, even if they lack resume-writing experience.
- **Smart Notification System**
- **Usage:** Sends personalized job alerts and interview invitations based on user preferences and interactions.
- **Benefits:** Keeps users informed in real-time with relevant and timely updates.
